

Korean Control Markings

By Vince McDermott (1787)

I enclose a copy of the Korean control marking I wrote to you about. Jim Kerr and other members of the Korea Stamp Society have determined that it is a control mark.

SEOUL KOREA

“Markings applied to Korean stamps by two groups outside the Korean postal system deserve special mention. The U. S. Embassy used a 28-mm linear marking reading SEOUL KOREA which is found occasionally on the Korean stamps issued between 1895 and 1905.”
